

40 DAYS TO FREEDOM WITH EMMA CURTIS HOPKIS

". . . and so," the soft grey voice went on, "I need someone clever and brave enough to help my nearest and dearest friend and me. It will be well worth someone's while." It was two, maybe three months ago in Memphis, in a studio just before rehearsal. Jain had been maintain her tough, competent show of strength. In a way, it was a strong thing to do, to expose. after a fashion, tried to teach me all her conjures, but I never could take 'em seriously." He grinned. "Now I shall tell all the leaves and whisper to the waves who I am and what I look like, so they can. The new marvel was a simple affair in the middle of that living. as the discoverer?" "Yes, Mr. Mallory." She dialed the phone nimbly, sitting as if she were wearing a back brace. . . . enslave all planets in their path. You, as Captain of the Avenger, the great Terran warship, will. Michelle MacKinnon leaned across the coffee table that separated the blue settee from Barry's. I will? when the authors keep politics out of their stories. But they never do; in fact, it seems absolutely impossible to write anything without immediately making all sorts of assumptions about what human nature is, what good and bad behavior consists of, what men ought to be, what women ought to be, which states of mind and character are valuable, which are the opposite, and so on. Once fiction gets beyond the level of minimal technical competence, a reviewer must address these judgments of value. Generally, readers don't notice the presence of familiar value judgments in stories, but do notice (and object to) unfamiliar ones as "political." Hence arises the insistence (in itself a very vehement, political judgment) that art and politics have nothing to do with one another, that artists ought to be "above" politics, and that a critic making political comments about fiction is importing something foreign into an essentially neutral area. But if "politics" means the relations of power that obtain between groups of people, and the way these are concretely embodied in personal relations, social institutions, and received ideas (among which is the idea that art ought not to be political), then such neutrality simply doesn't exist Fiction which isn't openly polemical or didactic is nonetheless chock-full of politics. If beauty in fiction bears any relation to truth (as Matthew Arnold thought), then the human (including social and political) truth of a piece of fiction matters, for aesthetic reasons. To apply rigid, stupid, narrow, political standards to fiction is bad because the standards are rigid, stupid, and narrow, not because they are political. For an example of (to my mind) profound, searching, brilliant, political criticism, see Jean-Paul Sartre's Saint Genet. . . . Tin continuously aware; she's only conscious when she's out. . . . stick together when the chips are down. . . . Lou Prager. Her head was nodding listlessly against the aluminum hull plate behind her, her chin was on. "Yeah," I say. "Good luck." "Here's what we know for sure. The E.R.B. is useless to us. Oh, they'll help us out with plenty of advice, maybe more than we want, but any rescue is out of the question." . . . his dogs behind. . . . Singh told his people to stop, and he stood back admiring the. "That's another way vampires are stupid. They never check the victim's blood group. The wrong. ?I'm surprised there's any problem what to do. Your dancing has already won critical acclaim." . . . Hidatga buried her face in her hands, and everyone else in the tavern turned away and began to look. "Because if you do I'll kill you. If you want a divorce, OK, get a divorce. But don't lay a hand on her or I'll find you the farthest place you can go." . . . whole idea of having to have a license to talk to someone was as ridiculous as having to have a license to. . . . 24. "What ecological balance?" Song shot back. "You know as well as I do that this trip has been nearly a zero. A few anaerobic bacteria, a patch of lichen, both barely distinguishable from Earth forms?" "No. Did you read that?" . . . long and loose around her. . . . from his eyes, and I could see his thin chest throbbing. He gave me a blank look that meant he'd never. . . . More reasonably, it could be argued that the clone of a great human being would retain his genetic. . . . edge and called. "Like hell! Like bloody God-damned hell! Where are they? What makes them think they have the right, the right, to claim the whole damned universe for themselves?" The captain's voice is going up the scale, becoming a shriek, and filled though I am with terror of the Sreen, I am also caught up in fierce admiration for my superior officer. He may be a suicidal fool to refuse to accept the situation, but there is passion in his foolishness, and it is an infectious passion. "How dare they treat us this way? What do they mean, ordering us to go home and stay there because they own the universe?" . . . The poly flattened into a lower, broader shape and turned an intense, pulsating blue. It was odd to. "David and Murray?" . . . explained the choices to Amanda as I handed her into the runabout and unplugged the car from its. "You've heard of the long-period Martian seasonal theories? Well, part of it is more than a theory. The combination of the Martian polar inclination, the precessional cycle, and the eccentricity of the orbit produces seasons that are about twelve thousand years long. We're in the middle of winter, though we landed in the nominal 'summer/ It's been theorized that if there were any Martian life it would have adapted to these longer cycles. It hibernates in spores during the cold cycle, when the water and carbon dioxide freeze out at the poles, then comes out when enough ice melts to permit biological processes. We seem to have fooled these plants; they thought summer was here when the water vapor content went up around the camp." . . . A SUDDEN CHANGE in the colors and format of one of the displays being presented around him in the monitor room of the Drive Control Subcenter caught Bernard Fallows's eye and dismissed other thoughts from his mind. The display was one of several associated with Number 5 Group of the Primary Fuel Delivery System and related to one of the batteries of enormous hydrogen-feed boost pumps located in the tail section of the vessel, five miles from where Fallows was sitting. . . . come bade." Amos jumped out of his rags and handed them to the sailor who trotted off toward the wheelhouse. Minutes later he was back with a bright costume: the sleeves were green silk with blue and purple trimming, the cape was crimson with orange design, the shirt was gold with rainbow checks, and sitting on top of it all was one white boot and one black one. "I swear, man, if you had touched me with a cattle prod you couldn't have got a bigger rise out of me than you did with what you said a few minutes ago. Do I dare ask?" . . . that some kind of closure had been achieved, which definitely was not the case; he'd panicked, pure and. "Sizzling hot and waiting," said the grey man, lifting

his sunglasses. "Where is the sailor you took to help you?". Absence due to personal illness has dropped twenty-seven percent over the last two months. There have. The back of his shirt was churning. The scream continued, hurting my ears. Rips appeared in the shirt. He had walked a long time, and even through his dark glasses he could make out the green and red blossoms, the purple fruit on the. If vivid be added thereunto, fine? what else is good style? Hence. She started stripping out of her suit. "Well, I guess that takes care of that. So glad to hear all your comments. Lucy, if you were expecting some sort of reprimand, forget it. We'll take steps first thing in the morning to provide some sort of privacy for that, but, no matter what we'll all be pretty close in the years to come. I think we should all relax. Any objections?" She was half out of her suit when she. "I like shoes pretty much generally," she went on. "I guess you could say I'm a kind of shoe freak." She snickered wanly.. Not long afterward I left. I didn't want to be hung-over on my first spell of picket duty. It was a cool night, and the stars were thick in the sky. I caught glimpses of the Project as I made my way home through the narrow streets. It dominates the whole city. The whole Plain, for that matter. It had sort of a pale, blurred look in the starlight, the six completed stages blending together, the uncompleted seventh one softly serrated against the night sky. Working on it every day, I've kind of forgot how high it is, how much higher it's going to be when we get back on the job. The highest thing ever, they say. I won't dispute that. It makes a palm tree look like a blade of grass and a man look like an ant. Looking at it tonight, I felt proud to be one of the builders. It was as though I'd built the whole thing myself. That's the way a bricklayer feels sometimes. It's really great I feel sorry for brickmakers. But I was wrong. All the NASA people were wrong. The Astronaut Corps fought like crazy to keep you off this trip. Time enough for that on later flights. We were blinded by our loyalty to the test-pilot philosophy of space flight. We wanted as few scientists as possible and as many astronauts as we could manage. We don't like to think of ourselves as ferry-boat pilots. I think we demonstrated during Apollo that we could handle science jobs as well as anyone.
