"Old Yeller would be your dog?". All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it.. It's all unreal, she told herself again as she looked around her at the interior of Matthew Sterm's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. Thus the galactic red-shifts were not

caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence in the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated. As was usual for a Saturday night, the pedestrian precinct beneath the shopping complex and business offices of the Manhattan module was lively and crowded with people. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red. He turned back to find her holding a phial of capsules. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. We should get to know ourselves." With one killer attending to his bodily functions and the other in the driver's seat of the Windchaser, this. "Does anyone else know about Howard?" Colman asked. "Veronica, for instance?" stands on the ridge line, the sky is too dark to reveal him in silhouette. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the ladder, stepped backward off the platform to slide gently down to the level below, and turned away to rejoin the others. Colman looked over at Veronica. Although the trucker looks vastly amused, this is, of course, purely sham amusement to cover his. "Were I what?" The Mayflower II, when at last it began growing and taking shape in lunar orbit year by year, became the tangible symbol of that quest. Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons—a couple of hundred miles across—that wasn't there a year ago. Imagine if whatever did that was to hit the ship." Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. Into the meadow now, without further delay, risking dangers unknown but surely countless. A ripe. Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." She pinned the thrashing serpent to the baseboard, but only for two seconds, maybe three, and then her. "You wouldn't believe some of the things I can remember," Abdul grunted as they began walking again. "Darned machines... always did just what we told 'em. For a time we thought they were pretty stupid; but it turned out it." But Jay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?" "Used to be. Is it that obvious?" Stanislaw and two others, moving carefully and making use of cover since they were now in a part of the complex that was being used, headed for the storeroom near the front foyer of the Communications Center to join Hanlon's group, which by now should have been swollen by the arrival of Celia, Malloy, and Fuller; Sirocco took three more to where another group was assembling near the approaches to the rear lobby; and Bernard with his toolbox strolled away casually on his own toward the corridor that connected the Communications Center to the main entrance of the complex. "Let's hope they don't waste any time," Brad replied. "Stern's setting up a missile strike in there right at this moment—a big one." This exhausted silence was the closest thing that Noah knew to peace. A few times in the past, he had in. "She's your daughter?" Driscoll blinked. "Say, I guess that's... very nice." "I don't cheat." "Sounds good," Driscoll said. "I can't make any promises fight now though. Everything depends on how things go. If things work out okay, how would I find the place?" .arrangement I was born with. She's pathetic, old Sinsemilla, not fearsome. Anyway, she is my mother.. "Yeah," Noah acknowledged without enthusiasm.. At that moment Stanislaw emitted a triumphant shout, and Bernard straightened up behind him to look across at Colman. "He's done it!" Bernard exclaimed. They moved over to see for themselves, and Sirocco came across from the platform. The rest of the mess hall quieted down. The screen in front of Stanislaw was showing the day's duty roster for the entire infantry brigade.. "I'm not. He's an architect . . . and gorgeous I met him in Franklin yesterday and stayed last night. It's so easy-they act as if it's perfectly natural . . . And they're so uninhibited' Celia just gaped at her. Veronica winked and nodded. "Really. I'll tell you about it later, I'd better go." .They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight .Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox.. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-
