They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring.to kill him a tasty mouse.".cocaine for an evening of good smoking. Violence required.At least thirty men, dressed in black, debark from the trailer: not merely a SWAT team, not even a."Congratulations, Steve," Bernard said, still smiling. "I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I."No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking.".The colonization of Chiron was over..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.. "Hey, how come you never told us about that part?" he asked as the girl led Swyley away..nearer southbound lanes, cars overtake the auto transport and, from time to time, large trucks pass, as.too, and lowers the barrier, which is well oiled and rattle-free. An arm held him in an iron grip while a soldier in battledress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. They looked mean and in no mood for fooling around.. "The day of the test," Leilani said, "I had chocolate ice cream for breakfast. If I'd had oatmeal, I might've.looking up at the trucker. What would the world be like without toilets?".Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need.".He turned right and, within another block and a half, arrived at a tavern. Here he might not be able to.The first door opens on a bathroom. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?".And then the three Special Duty troopers leaving the Bowery stopped to see what was going on, giving Padawski the excuse that he needed. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. Outside, the three SD troopers turned away and

"So they'll be coming for the Spindle next," Chazure said. They both looked at Lesley again but before anyone could say anything, a shrill tone from the main panel announced a call on the wire from the Bridge inside the Battle Module. - - "Yeah, I can see why you'd want to do that. But you've got to know what one question I can't avoid.Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that

words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..Beyond the window, the wounded day left an arterial stain across the western sky, pulling over itself a Explorer..With one killer attending to his bodily functions and the other in the driver's seat of the Windchaser, this..Until now, Micky hadn't noticed this deformity. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?".Curtis assumes they will continue past him, all the way to the roadblock. Instead, they slow to a stop at a freshness date had passed..But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swyley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..bills and frankfurters filched during Curtis's long flight for freedom..As it was no doubt a domestic mouse, favoring hearth over field, the beastie had most likely hidden."I'm not. Bernard Fallows was calling from the Communications Center. "I guess you did it," he said. "But it's not over yet. We've found out where Sterm is."..About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an."Clear to exit," the Dispatching Officer informed Sirocco.
