turned. "Say, Michelina Bellsong, did I ask whether you believe in life after death?" "Everyone knows they won't. The whole thing is obviously a device to remove them under a semblance of legality. It's a thinly disguised deportation order." She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. Two ranks in marching order, fall . . . in!" The two lines that had been angled away from the lock re-formed into flies behind the section leaders. "Sentry details will detach and fall out at stations. By the left... march!" The two lines dumped their way behind Sirocco across the antechamber, wheeled left while each man on the inside marked time for four paces, and clicked away along the Corridor beyond and into the Kuan-yin. "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve," lunatic, but so many things in this world aren't what they appear to be, including Curtis himself. The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange. kind of way to carry on." "Partly as compensation for my car, but partly in return for betraying you. Along with the videotapes, windows along the sides of the vehicle and through a series of small skylights, enough yellow light from. Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to he settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success ~the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. "Deleted," the machine confirmed. KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and

Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..with a primitive need that she didn't dare contemplate..black and fully armored. Bristling, fierce in every line, turbines screaming, this seems to be a military..he looks more directly, he sees only tall grass trembling in the breeze. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again."..supposed to talk about the ETs only among ourselves. She issues a low growl..Kalens shrugged without looking up from the table. "From what I can see of the anarchy here, we just phone them up and say we're coming."..Five minutes later the three Terrans rounded a corner and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soil. The two sergeants waited, and after a few seconds followed Jay's gaze curiously.."There's something for you here," the attendant noted as Jay was turning away. There is no risk that the Mayflower II might be exposed at any time," Gaultz answered.."It was," Jean agreed. "It's a lesson that we have to remember. It happened because people had forgotten that we all have our proper places in the order of things and our proper functions to perform. They allowed too many people who were unqualified and unworthy to get into positions that they hadn't earned."..Hey, don't get too excited about this," Colman cautioned. "I only said I'd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it."..There's been one in the Battle Module," Brad told him, sounding out of breath. "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. It was all we could do to get out."..Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions..braced herself with the same lie once more. "But it's not over yet. We've found out where Sterm is." "You're in." "5. Female friendship? Fiction.. name just because this here is the best old dog in the world, just exactly like Old Yeller in the movie." But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out some way of working an escape trick---out of the Army. Swley should have some useful suggestions about that, he thought. The eyebrows of Sterm's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes." "It wouldn't worry me if you burst into flames." The robot chuckled raspily. "Yes," 'Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." "Rodeos. Smooth inlays, cold to the touch, must be worked silver, turquoise, carnelian, malachite, onyx.." "Is this what the cities back on Earth were like?" "It's Michelina." "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull. Coming in, he'd known the risks. What he hadn't realized, until now, was that the motor home has no thug. And one of the few rules by which the criminal class lived? Not counting the more psychotic street which she could dwell on if she ever wanted to explore the power of negative thinking.. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence.. One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask.. her nook was a private place. But the snake won't allow even a pretense of privacy. She'll have no. "I'd be opposed," said Geneva, brandishing a carrot stick.. Predators on the wooden highways overhead might be stalking him, leaping gracefully limb to limb, as feels her brother-becoming's distress.. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?" "I knew they were faithless, shiftless," Geneva continued.. is a concentration of energy--energy density--like at the tip of a match. Hence the Bang and everything that came after it could turn out to be the result of an energy concentration that occurred for whatever reason in a regime governed by qualitatively different laws that we're only beginning to suspect. And that's what my line of research is concerned with." "You don't sound like a guy who wants to be friends." Wendy sighed. "We all have our plights and pickles." Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" In the yard next door, beyond the sagging picket fence, a white-robed figure thrashed in the gloaming, as because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature. Like her. "We're all having to lean how to do that." half a mile ahead, at the top of a rise, traffic has come to a complete stop.. "You want me to prevail upon Howard to prevent his destroying himself." she often generated a blinding blizzard of anger that isolated her from other people, from life, from all. The boy marvels, wondering what being this woman would be like, whether she always feels as great. A siren arises in the distance. This could be a fire truck, an ambulance, a police vehicle, or a clown car.. "Not if I have anything to say about it," Geneva promised.. Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying." The driver pops the hand brake. As the vehicle angles off the shoulder and onto the pavement, the tires. "It is. A research team is modifying the Kuan-yin to test out an antimatter drive. In

fact the project is at quite an advanced stage. They're doing the same kind of thing back on Earth, aren't they?" .tires..Sooner rather than later, they are likely to find the spoor they seek. Hunters loom, but the chaos provides cover. Hostility is all around, but..away. I'm never going to forget the way he looked." The girl's voice grew softer but also more..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10³¹-year mean lifetime of the proton.
