Then Losen cursed and cried, and his slaves brought him wine, and the mage went out, bowing, and checking as he went to be sure that the spell of paralysis was holding. Little to lose. The wise man and wise woman, trusted and held in reverence, gave way to the stock. A woman of power, she knew what he was. Had she called him there? The wizard kept the name Roke in his memory, and when he heard it again, and in the same connection, he knew Hound had been on a true track again. She did not speak. In Golden's understanding, money was power, but not the only power. There were two others, one equal, one greater. There was birth. When the Lord of the Western Land came to his domain near Glade, Golden was glad to show him fealty. The Lord was born to govern and to keep the peace, as Golden was born to deal with commerce and wealth, each in his place; and each, noble or common, if he served well and honestly, deserved honor and respect. But there were also lesser lords whom Golden could buy and sell, lend to or let beg, men born noble who deserved neither fealty nor honor. Power of birth and power of money were contingent, and must be earned lest they be lost. The parents died young. So not much heed was paid to him, until they had to take notice of him. From horseback; yet he felt short, he felt small. What the commodifiers of fantasy count on and exploit is the insuperable imagination of the smoke he saw far down the shore. Behind him were the tracks of an otter's four feet coming up from. The poem begins with the best known and most cherished love story in the Archipelago, that of Morred and Elfarran. In the third year of his reign, the young king went south to the largest island of the Archipelago, Havnor, to settle disputes among the city-states there. Returning in his "oarless longship," he came to the island Solea and there saw Elfarran, the Islewoman or Lady of Solea, "in the orchards in the spring." He did not continue on to Enlad, but stayed with Elfarran. To pledge his troth he gave her a silver bracelet or arm ring, the treasure of his family, on which was engraved a unique and powerful True Rune. Long after the invention of the True Runes, a related but nonmagical runic writing was developed for the Hardic language. This writing does not affect reality any more than any writing does; that is to say, indirectly, but considerably. But a year or so later he saw Diamond out in the back garden with his playmate Rose. The children were squatting on their haunches, heads close together, laughing. Something intense or uncanny about them made him pause at the window on the stairs landing and watch them. A thing between them was leaping up and down, a frog? a toad? a big cricket? He went out into the garden and came up near them, moving so quietly, though he was a big man, that they in their absorption did not hear him. The thing that was hopping up and down on the grass between their bare toes was a rock. When Diamond raised his hand the rock jumped up in the air, and when he shook his hand a little the
