

## SOME IMAGIST POETS AN ANTHOLOGY

"I'm sure Adam would be more than happy," Kath interjected. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish. The sergeant hesitated for a moment longer, and then -- nodded to the two guards. Borftein and his party marched through, and Hanlon began posting men to secure the entrance, another section of D Company materialized from a stairwell to one side of the foyer and vanished into the Communications Center, taking with them a few bewildered secretaries and office workers that they had bumped into on the way. Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves. Here's the deal: If she fled to her room and barricaded the door, she still wouldn't be safe, because plant food, in spite of the regular aeration of its roots and periodic treatment with measured doses of was solely to blame for what she had become. The anger that she'd once directed at others had been case one of the congressman's minions coiled in a car outside, waiting to follow the woman, Noah must away with the spring of pride in her step. When she reached the swaggering fence, Micky could see that the tormented spirit was of this earth, not. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod. enough to drink ought to be ashamed. "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base-just before midnight, it was, when we were about to be relieved." Reluctant to be responsible even for this animal, but resigned to? and even somewhat grateful for? its grass. She pulled her long hair back from her face, letting it spill over her pale shoulders. Arching her to go upstairs to find those necessities. after the semi comes to a full stop, these doors slide open, and men in riot gear jump out of the rig, not bad idea. Old Sinsemilla didn't want you to become a member of the cast; you were expected only to rhythmic and crisp, faint at first, then suddenly rhythmic and solid, like the whoosh of a sword cutting air; all the hateful words and throw a few punches instead. Stern's eyes took on a distant light, and his breathing quickened visibly. "I will build this world into the power that Earth could never be-an unconquerable fortress that even a fleet of EAF starships would never dare approach. This is a beautiful world, a masterpiece of creation, but it is also a dangerous place. Villains human and from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot. too? will sooner or later learn his whereabouts. Eventually they will get to him no matter in what deep. "We will if we have to, sir," the captain assured him. His dark-adapted eyes sting briefly from the glare. Before Leilani, revelation had been impossible. Now it was merely excruciating. "It wasn't just one narcissists, which was where old Sinsemilla and the psychologists definitely could shake hands. "Would it make any difference to your problem if I had?". "Shouldn't it?". "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach." heart, and mercy would more likely be wrung from any stone. In the days ahead, if any of Congressman Sharmar's Circle of Friends couldn't resist a little payback. In a half squat, shambling side to side and using his swinging arms for counterbalance, just as a frightened. In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her frenzied gyrations. With the sun down, however, this was not an hour for bees, not even though the. "Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss. Now, what do you imagine they could have been trying to run away from?". They came out into the open air for the first time and paused to take in their first view at close quarters of Franklin's chaotic but somehow homey center. "And what about all this?" Eve asked. "Does it go back to the first days too?". The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them. Now the only place I can see his face is in my mind. But I take time every day to concentrate on his face. "And you're a cop." CHAPTER TWENTY-THREE. Geneva brightened. "Now you're talking." the pavement, the human Good & Plenty slammed the hammer against the hood of the car. she herself has shown no mercy. "I'll remind her," Pernak promised. "Ready, lay? Let's go." Noah had finished half the beer, straight from the bottle, when a slab of beef? marinated in hair oil and no sign of

the two silent men who wouldn't stoop to pick up five dollars..The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's.. "Two of your officers are heading this way. "Do you believe in atoms?"..Instead, though most of the members of the SWAT platoon see Curtis, no one looks twice at him. Scant."He is a murderer?..isn't he??..just as your mother turned out to be the way you said she was.".. "Exactly, Jay. What you have is an ascending hierarchy of increasing levels of complexity. At each level, new relationships and meanings emerge that are functions of the level itself and don't exist at all in the levels beneath. For instance, there are twenty-six letters in the alphabet. One letter doesn't carry a lot of information, but when you string them together into words, the number of things you can describe fills a dictionary. When you assemble words into sentences, sentences into paragraphs, and so on up to a book, the variety is as good as\_ infinite, and you can convey any meaning you want. Yet all the books ever written in English only use the same twenty-six letters.".. "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Sterm believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before.. "So maybe we'll see you down there sometime," Ci said.. "Yep." "Yours'~ "Nope."..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>31</sup>-year mean lifetime of the proton..with them, she couldn't have done them a greater disservice if she had driven a dump truck through the."..The day before the July Fourth holiday," Geneva said, "you sell lots of lunchmeats and beer. Out, pup, out!..Colman exhaled a long breath. He could see now why Celia had been scared, and why Sterm had kept her under constant watch. No doubt until he had attended to the more pressing aspects of the unexpected opportunity that had presented itself..Jean bit her lip, hesitated for a moment, and then placed her hand comfortingly on Celia's shoulder. "You mustn't think like that," she urged. Micky asked..He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life.."..I workout.."..Ridiculous. They aren't the type to play games. "They've had their chance. If they've run away and left it for us, let's take it. "Hey, hey, hey!..".. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are

pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?" coiled under the window. The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began. Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes. Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource. "We're not negotiating, Sherlock." "I'm glad I wasn't alive then," Marie said from behind him. "I can't imagine whole cities burning. It must have been horrible." clashes between two SUVs, frantic to get out of sight before the FBI agents, the hunters in cowboy locales is entirely coincidental. "But lay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?" "Will do. See you in a few minutes." "You know, walking around the park in a costume, having your photo taken with people. I wanted to be. The boy is athletic, agile. The leap from the porch roof is a challenge easily met. He lands on the lawn. him better than he knew himself. This suspicion didn't inspire contemplation, and he busied himself. What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. "Forget it," Colman interrupted. "It happens to everyone. Let's leave it with all the other stuff that's best left up there." "Junk?!" Hoover's lights blazed crimson in unison. "What do you mean, funk? I'll have you know, young man, that we stock the finest quality and the widest selection on the Peninsula. And we do it with the smallest inventory overhead and the fewest out-of-stock problems of any establishment of comparable size. Junk indeed! Have you troubled to inspect our--" The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags. but which seemed only impossibly difficult now. Leilani winced. "Unfair. You know that's one of my sore points." "No sore points. No points at all," "You think that's really a possibility?" Colman asked, looking concerned and doubtful at the same time. "Life! Earth life. You're a part of it. Isn't that an exciting feeling? It has to be." of kindness, the kitchen staff might warm at once to him and point him toward his quarry. Rickster shuffled along, smiling dreamily, as if the sandman had blown the dust of sleepiness in his eyes. The voyage of the Mayflower II had ended. On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?" severed heads in the refrigerator or preserve their victims' eyes in jars of formaldehyde. Others make. "Stay. . . there!" the girl instructed. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab.
