"Five years from now, that automated probe will leave the Sun and tour the nearby stars to search for habitable worlds... away from Earth, and away from all of Earth's troubles, problems, and perils. Eventually, if all goes well, it will arrive at same place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. "A new, fresh, vibrant world, unscarred by Man's struggle to elevate himself from the beasts, a place that presents what might be the only opportunity for our race to preserve an extension of itself where it would survive, and if necessary begin again, but this time with the lessons of the past to guide it." "Matthew Gordon?" she asked in a soft, hesitant voice I remembered from political broadcasts in the last election, extolling the senatorial virtues of her father. "Tm Amanda Gail. This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then yon are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. Yon press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..That sweet, yielding, dependency is no more than what her father trained into her.
