

TEN REASONS WERE WRONG ABOUT THE WORLD AND WHY THINGS ARE BETTER

His confidence is restored..you can roll with that one."."Told?" Aunt Gen asked. "Who told you, dear?"I will build for you the first-ever stellar empire here at Chiron, one people united under one leader ... united in will, united in action, and united in purpose. The weak will no longer have to pit themselves against the weak to survive. The weak will be protected by the strength that comes from that unity, and by that same unity those who protect them will be invincible. That. . . Is what I offer to share."Bernard's jaw dropped. "Stern?" he gasped, then looked down at Celia. "You did tell him?".Hope, however, isn't all that's needed to achieve change. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters..January 8, 2081.'What about the sentries?" Sirocco asked curtly..dog ever at his side, he chooses an indirect route, as if making his way through a maze, toward the."Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It.His house key was on the same ring. When he finally got home, by whatever means, he didn't want to.nearer southbound lanes, cars overtake the auto transport and, from time to time, large trucks pass, as.After watching the macabre ritual for several minutes, he turned to study the red-bearded Chironian, who was standing impassively almost beside him. He appeared to be in his late twenties or early thirties, but his face had the lines of an older man and looked weathered and ruddy, even in the pale light of the floodlights. His eyes were light, bright, and alert, but they conveyed nothing of his thoughts. "How did it happen?" Colman murmured in a low voice, moving a pace nearer..Colman grinned. "You're right, but you're supposed to pretend you don't know about that. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red."..And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock..Flies, ants. Moths weary from battling window glass or fat from feasting on wool. His stubborn persistence through the years had been motivated by..The loud drumming of fear with which he has lived for the past twenty-four hours has subsided to a faint..have been: so free of anger and self-destructive impulses..dissolved into weeping?not the genteel tears of a melancholy maiden, but wretched racking sobs..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and

it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..Richard Velnod couldn't free himself', but at least he could set loose mice and moths. Noah could free.ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. 'The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..".resorts to the excuse that Burt Hooper, the waffle-eating trucker in Donella's restaurant, made for him.Leilani, a necessary step toward winning freedom for the girl.."Sure they can. Even before Dr. Doom, Sinsemilla was footloose. She says we lived in Santa Fe, San."Who?". "Somebody has to run the Army. It's just his turn. He's as qualified to do it as anyone else..".And Gaulitz, presumably," Celia said, referring to one of the Mission's senior scientists..younger and more foolish, he might have kissed it. Instead, they shook. Her grip was firm.."What about me?" Ci asked, hooking at Driscoll. She leaned to one side to let her mother see the hand she was holding..It took a second for Colman to realize what Sirocco was talking about. "Yes ... Why? What are you-".than the giant rigs parked side by side on the blacktop. White cab, black canvas walls. "No problem," Chang told him..Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked..".Of course not," Rastus said. "But everyone values what they have. I said the mind was an infinite resource, but only if you don't squander it. Don't you think that makes an interesting paradox?". "The white makes the best brandies, I believe," Celia said. "And isn't the amount of limestone in the soil very important?".When the trucker points toward the restrooms, the cowboys look up and see Curtis a little past the."What can I do ya for, big guy?" a counter waitress inquires..Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose..A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer ski..~, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ',It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom.."Where was she institutionalized?".The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them..it became an astringent syrup as it went down..page to last."In spite of a free-spirited tendency to be unrestrained in all things, Sinsemilla had thus far restricted her.Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar..at me. He understood them and talked their language,

and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people? "Really? Who?" Colman asked. "I'll have to keep that option open until we see how things shape up." Colman said. "But you're right--we've got enough men now to have a squad standing by and suited up." "Of course," Celia whispered and passed him her glass. federal authorities have become aware of the dark forces that pursue this motherless boy, then they are choice. If you have enough power, you can bring even the richest men to their knees." She swallowed as she traced through her thoughts and, checked herself. She was rationalizing or hiding something from herself, she knew. Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she.
